# JOHN MARK LUSTE

+639507791280 | luste.johnmark19@gmail.com | Sagay City, Neg. Occ. | https://devjohnmark.vercel.app

## PROFESSIONAL SUMMARY

IT graduate with hands-on experience in web application development, database management, and mobile application development. Skilled in PHP, Vue.js, Laravel, React Native, and SQL, with experience deploying web applications and building offline-first learning systems.

## TECHNICAL EXPERIENCE

**Software Engineer Intern - Server Configuration App** **Thy Web Dev Inc. | Present**

- Designed and developed a server configuration dashboard using the Vultr API, automating DNS subdomain management and integrating Git-based deployment workflows to streamline server monitoring.

**Freelance Developer - Website and Web System Application** **Freelance | 2023 – Present**

- Designed database schemas, system workflows, and user interfaces based on client requirements for academic and organizational applications.
- Developed web systems for academic records, grading, internship tracking, school portals, and candidate information using PHP and database technologies.

## SELECTED PROJECTS

**Organic Agriculture Learning App** **Present**

- Developed an offline-first Android learning app using React Native, Expo, and TypeScript for Organic Agriculture Production.
- Implemented SQLite storage for lessons, quizzes, bookmarks, student progress, and achievements, and built Android applications using EAS.

**FluentFlow - A English Situational Learning App** **Present**

- Developing an offline-first English learning app using React Native, Expo, TypeScript, and SQLite for high school students.
- Designing interactive grammar, vocabulary, spelling, and sentence-building exercises with local storage for offline access.

**OJTrack - Attendance Management System** **Present**

- Developed an OJT attendance management system using PHP (OOP/MVC), Vue.js, and MySQL/Supabase, supporting student, faculty, and administrator workflows.
- Implemented schedule viewing, attendance recording, punctuality monitoring, and photo verification; deployed the backend on Render and frontend on Firebase.

**MyEduTour - Educational Tour Management and Monitoring System** **Present**

- Developed MyEduTour, an educational tour management system for SUNN-CCIS using PHP (OOP/MVC), Vue.js, and MySQL, with a React Native and Expo mobile application.
- Implemented real-time student location tracking and tour requirement monitoring to help faculty and administrators monitor student whereabouts, verify requirements, and improve educational tour coordination.

## EDUCATION

**Bachelor of Science in Information Technology** - State University of Northern Negros (SUNN) - Old Sagay Campus - Brgy. Old Sagay, Saga City, Negros Occidental - 2026

## TECHNICAL SKILLS & CERTIFICATIONS

- Languages: PHP, JavaScript, SQL, TypeScript
- Frameworks: Laravel, Vue.js, React, React Native, Expo
- Databases: MySQL, MariaDB, Supabase, Firebase, SQLite
- Tools: Git, GitHub, Docker, Postman, XAMPP
- Certifications: CCSA; OJT Completion Certificate
